

# EVP-X series loudspeakers

**The Wharfedale Professional EVP-X series loudspeakers combine exceptional design and features with outstanding sound quality to provide a choice of sound systems to suit almost any application.**

## Elliptical Wave Guide

In comparison to a conventional rectangular horn, the Elliptical Wave Guide offers superior control over HF coverage, with reduced distortion, greater output and smoother frequency response. The elliptical shape means that there are no corners or parallel surfaces to distort, diffract or reflect the sound--therefore the output is smoother, cleaner and more consistent. Again, due to the elliptical shape, mid to high frequencies are diffused more efficiently. When coupled with a true compression driver, the result is brilliant, natural HF reproduction.

## SYSTEM PROTECTION

The ProTech protection system in the EVP-X progressively converts excess power into heat and triggers a reduction in the power to the HF Driver. When the overload condition is removed, the system returns seamlessly to normal operation.

## SOPHISTICATED CROSSOVER DESIGN

EVP-X series features sophisticated crossover networks for an exceptionally smooth frequency and power response. High voltage capacitors and inductors with massive cores and heavy gauge wire are used throughout, enabling the crossover network to handle incredibly high power without saturating.

## BUILT TO LAST

The EVP-X cabinets are constructed using high grade, low resonance composite wood and covered with a road tough industrial carpet. A heavy duty full length steel grille protects the internal components from damage.

## VERSATILITY

Full range cabinets in the EVP-X Series are trapezoidal in shape and therefore easily arrayable. They also feature an alloy stand adaptor in the base of the unit for mounting on tripods or for use in combination with one of the complimentary sub bass systems.

## EASE OF USE

The EVP-X have the added benefit of signal present and HF protect LED indicators on the front of the loudspeaker--green to show signal present and orange to show the HF bulb is active, making it easy to monitor the system levels.

**These loudspeakers combine superb vocal projection with tight bass performance in a range of compact cabinets.**

**EVP-X15B**

15" compact subwoofer

**EVP-X18B**

18" compact subwoofer

**EVP-X215**

Quasi 3 way full range
