

The all-new Impact Series encapsulates everything Wharfedale Pro stands for – High quality pro audio, at an affordable price. On this occasion we have raised the bar for affordable PA delivering a PA speaker series with a sound and aesthetic comparable to that of a much higher price bracket.

Full-Range Impact
The Impact Series has a desirable high power capacity and clarity, as well as an exceptional low frequency output providing tight bass all the way down to a 30Hz response. For high frequency, a 1.75" titanium diaphragm compression driver produces a powerful yet neutral sounding high end. All impact series speakers use new, specially developed LF & HF drive units acoustically matched with an equally durable cabinet.

Built to take an Impact
The series comprises of four models, Impact 15, 215, 18B and 218B. The strong wooden cabinets are covered in a textured black paint to give a durable yet stylish finish, which brings a professional look to any sound reinforcement environment. The finish is extremely hard wearing and is leagues above any other carpet covered cabinet in the same price point.

Affordable Loudspeakers You Can Trust
Everything about the Impact Series screams 'Premium Product' except for the price tag, and we believe that you will find it impossible to find a better sounding loudspeaker for anywhere near this price point. Not only does the Impact series represent excellent value for money, it meets are stringent quality control standards. For both dedicated sound engineers and touring musicians gigging week after week, you will be able to put your trust in the Impact series.

Impact

Key Features:

- A new affordable, powerful passive speaker range
- 1.75" Titanium diaphragm compression driver
- 90°x45° Waveguide
- Newly developed high power LF & HF drivers
- Plywood cabinet
- Durable black paint finish
- 2 x Speakon / Thru inputs
- Dual angle 35mm speaker pole inputs
