WLA-210A

Active Line Array System

So much more than 'simply' another 10" active array.....the new WLA-210A system brings many new features and technologies to the party!

With the design detail required for serious fixed install or for touring, WLA-210A has been designed and engineered in the UK.

Dual 15" active sub makes a practical and powerful system. 2000 W continuous.

3.0" HF compression driver directly coupled to the EVO-Fold waveguide.

DUAL 10" custom drivers designed and engineered in the UK.

Custom phase plugs deliver a wider and more consistent mid-range horizontal coverage and better coupling between the LF and HF in the crossover area.

EVO-Fold waveguide reduces the usual phase issues that traditional two-way line arrays have.

Control Software for remote management and system control.

Downloadable EASE.gll files

Internal DSP with FIR filters
750 Watts Continuous power
powerCON™ AC connectors
Network (RS485) system management
