

# VALIDATED INSTALLATIONS

Tell us about YOUR successful installations to get the 'VALIDATED INSTALLATION' stamp of approval.

Simply complete the online form and upload any documents / pictures. Our team will inspect the information and if everything is in order, will validate the project. After validation, the project will also be promoted on [www.wharfedalepro.com](http://www.wharfedalepro.com) and on Wharfedale Pro social media channels.

*VALIDATED INSTALLATION means that the project concept has been checked by us here at Wharfedale Pro. It is NOT a project certification but it is a chance to check and approve the system theory with us, the manufacturer. There is no change in the legal responsibilities of all parties involved with the installation.*
